

Damir Novosel is president of Quanta Technology, a subsidiary of Quanta Services, a Fortune 500 company. Previously, he was vice president of ABB Automation Products and president of KEMA T&D US. Damir is one of the nation's leading business and technology leaders in the areas of T&D power systems and utility automation. He has developed and helped implement a number of pioneering concepts, methods, and products that improved reliability and efficiency of power grids.

Damir was elected to National Academy of Engineers in 2014 and is IEEE Power and Energy Society (PES) President Elect. He served as chair of the PES Technical Council and Vice President of technology from 2010 to 2012.

Dr. Novosel holds 16 US and international patents and published over 100 articles in Transactions, Journals and Proceedings, receiving PES 2011 and 2013 Prize Paper Awards. He has led or participated in numerous industry standards, publications and other initiatives.

He holds PhD and MS degrees in electrical engineering from Mississippi State University, where he was a Fulbright scholar, and the University of Zagreb, Croatia, respectively.
